1. The following is an examiner's statement of reasons for allowance: claim 8 defines over the prior by setting forth that the securement between the first and second inflatable mattress is along a portion of the first inflatable compartment at a point spaced inwardly from the sides of the first inflatable compartment along with the function of allowing the first and second compartments to move relatively to one another except at the periphery thereof. This function implies that the securement is about the periphery of the assembled compartments and spaced inwardly of the sides of the compartment. This is the only structure, i.e., the securement about the periphery, disclosed that would allow movement between the first and second compartments except at the periphery. Claims 27 and 30 are allowable because they specifically and directly recite the securement between the first and second compartment is a perimeter seal spaced inwardly from the sides of the first compartment.

Cope, 5727270, discloses a first compartment secured (113) at least at a portion inwardly of the walls of the first compartment to a second compartment, but fails to disclose first and second compartments that are free to move with respect to each other except at the periphery thereof. Cope's mattress is open on opposite ends to allow insertion of an object to be packaged. To modify Cope's mattress to prevent movement between the first and second compartment at these portions of the periphery would destroy the intended use of Cope's device, i.e., it would prevent the ability of inserting a package into the center of the mattress between the first and second compartments. Cope also discloses that the inflatable structure could be used as a mattress but doesn't specifically show it in a mattress configuration, wherein the periphery of the

compartments are secured from movement relative to one another. Thus, it doesn't meet the limitation of the securement being spaced inwardly of the sidewalls to prevent movement between the first and second compartments at their periphery.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
